Professional Summary

Software Engineer with over 3 years of experience in back-end development and UI/UX design and testing, proficient in Python, Go, React and Typescript.

Proven track-record of building and improving system efficiency and reliability, including reducing bugs by 20% and enhancing deployment speed by 15% through cloud migration and automation. Skilled in Docker and Kubenettes deployment platforms, automated testing and collaboration with cross-functional teams to deliver impactful software solutions. Certified Software Developer and CISCO Network Configurations with a strong commitment to code quality and agile development methodologies.

Work Experience

Software Development Apprentice - Teach2Give, The Jitu *May 2025 to August 2025 | Murang'a, Kenya*

- Developed websites using React and NodeJS showcasing product management and dynamic content generation. Enhanced data persistence via Postgres and Prisma ORM with Neon cloud database increasing development speed by 25% and deployment by 30% via Vercel for speedy prototyping.
- Co-engineered back-end APIs using ExpressJS and Bun runtime with colleagues providing up to 50% faster front-end development due to quick data access via the API calls.
- Developed and maintained blogging and note taking Web Apps in teams of over 10 members while assuming product manager role.
- Mentored and Pair-Programmed with colleagues on User Experience and aesthetic design, data structures and code optimization techniques raising the maintainability by 30%.
- Conducted soft-skills sessions teaching on confidence, attention and self-carriage in interviews which proved a 70% rise in confidence of fellow colleagues.

Voluntary Experience

Team Leader - PastLens, JKUAT AI Hackathon *July 2025 to November 2025 | Murang'a University*

- Lead a team of 5 members to build a Language translation and Artifact analysis and description leveraging Artificial intelligence for Image Scanning and clustering on Kikuyu and Maasai cultures.
- Assigned roles for Pitch Deck design, documentation, product manager and system engineering resulting to 12 days reduction in development time due to task specification.
- Trained AI model via labeled data on images and language producing the prototype in a 21 days.
- Attained the 1st runners up position in the JKUAT AI hackathon Culture preservation category.

Volunteer Developer - Google Developer Students Club *January 2023 to Sep 2024 | Murang'a University*

- Conducted coding workshops and mentored peers in Python & JavaScript.
- Led hands-on projects to enhance practical coding experience.
- Conducted programming sessions teaching on Data structures and Object-oriented Programming patterns helping reduce DRY code by 40%.

Education

Bachelor of Science in Software Engineering

Murang'a University of Technology | September, 2022 to April, 2026

Graduation date: August, 2026

Fullstack Software Development

Teach2Give, The Jitu | May, 2025 to August, 2025

Graduated on: 15th August, 2025

Kenya Certificate of Secondary Education, KCSE

Njiiri School | January 2018 to April 2022 | KCSE Score: B+

TECHNICAL SKILLS

Languages: Python, GoLang, JavaScript, TypeScript, C++, SQL, HTML, CSS

Frameworks & Libraries: React, NodeJS, ExpressJS, HonoJS

Styling: Material UI, Tailwind CSS, Shadcn UI

Databases: MySQL, PostgreSQL, Redis, Prisma ORM, MongoDB

Tools : Git, GitHub, Postman, Jupyter Notebook, Warp, Vim, Docker
