PROFESSIONAL SUMMARY

Software engineer with 3+ years of experience across back-end and front-end development, UI/UX design and testing, working mainly in **Python, Go, TypeScript and React**. Has built API integrations, CI/CD automation and data workflows that improved deployment speed by 30% and cut production errors by 20%. BSc Software Engineering graduate (**Second Class Honours, Upper Division**) and certified full-stack developer.

EXPERIENCE

Full Stack Developer | Teach2Give / The Jitu May 2025 – Aug 2025 · Nairobi, Kenya
Accredited full-stack programme, certified August 2025

- Cut front-end development time by up to 50% by co-building **REST APIs** with ExpressJS and the Bun runtime, giving React front ends quick access to PostgreSQL data across three team projects.
- Sped up deployment by 30% by setting up automated **CI/CD** with Vercel and GitHub Actions, with input validation and secure coding checks that reduced production errors by 20%.
- Built a data workflow with **Prisma ORM** and a Neon cloud database, loading structured content into PostgreSQL with schema validation, which raised development speed by 25%.
- Delivered a blogging platform and a note-taking app with a team of 10+, working in agile sprints, stand-ups and retrospectives, and taking the product manager role.
- Mentored and pair-programmed with peers on UX and visual design, data structures and code optimization, raising codebase maintainability by 30%.
- Ran soft-skills sessions on confidence and self-presentation in interviews, which lifted colleagues' confidence by 70%.

Team Leader, AI Engineering | PastLens, JKUAT AI Hackathon Jul 2025 – Nov 2025 · Murang'a
1st runners-up, Culture Preservation category

- Led a team of 5 building an AI tool for translation and artefact analysis of Kikuyu and Maasai culture, using image scanning and clustering.
- Cut development time by 12 days by assigning clear roles across pitch deck design, documentation, product management and system engineering.
- Delivered a working prototype in 21 days by training a computer vision model on labeled image data and connecting it to language translation.
- Extracted, cleaned and labeled 500+ cultural artefact images for training and evaluation.

Volunteer Developer | Google Developer Students Club Jan 2023 – Sep 2024 · Murang'a University

- Ran hands-on Python and JavaScript workshops and mentored 40+ peers on data structures, object-oriented programming and application development.
- Reduced repeated (non-DRY) code by 40% in peer projects by teaching code reuse and cleaner structure.

EDUCATION

BSc Software Engineering Murang'a University of Technology <i>Graduated Aug 2026 · Second Class Honours, Upper Division (68.68)</i>	<i>Sep 2022 – Apr 2026</i>
Full-Stack Software Development Teach2Give / The Jitu <i>Graduated 15 August 2025</i>	<i>May 2025 – Aug 2025</i>
Kenya Certificate of Secondary Education (KCSE) Njiiri School <i>Grade B+</i>	<i>Jan 2018 – Apr 2022</i>

TECHNICAL SKILLS

Languages: Python · Go · JavaScript · TypeScript · C++ · SQL · HTML / CSS
Frameworks: React · Node.js · Express.js · HonoJS / Bun · Tailwind CSS · Material UI · Shadcn UI
Databases: PostgreSQL · MySQL · MongoDB · Redis · Prisma ORM
Tools: Git / GitHub · GitHub Actions · Docker · Vercel · Postman · Jupyter Notebook · Vim

CERTIFICATIONS

- Certified Software Developer, Teach2Give / The Jitu (2025)
- CCNA: Introduction to Networks, Cisco Networking Academy
